

# GAGAN NAGAR

Full Stack Developer – React.js • Node.js

Indore, MP | +91 88396 76156 | gaganngr319@gmail.com  
linkedin.com/in/gagannagar | github.com/GaganNagar | gagannagar.vercel.app

## Professional Summary

**Full Stack Developer** with hands-on experience delivering MERN stack applications from development to production deployment. Built **InterviewAI** — a AI-powered platform using Google Gemini API, JWT authentication, and RESTful API architecture, currently live on Vercel. Skilled in React.js, Node.js, MongoDB, Tailwind CSS, and scalable component design. Actively seeking **Frontend** or **Full Stack Developer** opportunities to contribute to product-driven engineering teams.

## Technical Skills

**Frontend:** React.js, JavaScript (ES6+), TypeScript, HTML5, CSS3, Tailwind CSS, Responsive Web Design

**Backend & Database:** Node.js, Express.js, MongoDB, REST API Design

**AI & Integrations:** Generative AI Integration, Prompt Engineering,

**Tools & Concepts:** Git, GitHub, Postman, Data Structures & Algorithms

## Projects

### InterviewAI — AI-Powered Interview Preparation Platform

*MERN Stack | Generative AI Integration*

GitHub | [Live Demo](#)

- Engineered a full-stack AI interview preparation platform integrating **Generative AI**, enabling technical and behavioral interview practice, personalized learning roadmaps, **ATS score** evaluation, and AI-generated ATS-friendly resumes.
- Architected **12+** RESTful API endpoints with JWT authentication, protected routing, and session management — handling complete user auth lifecycle end-to-end.
- Built a modular frontend using React Hooks and Context API with **10+** reusable UI components, reducing redundant code across **6+** feature pages.
- Deployed production build on **Vercel** with environment variable configuration, ensuring consistent rendering across Chrome, Firefox, and Safari.

### Role-Based Employee Management System

*MERN Stack*

GitHub

- Developed a full-stack RBAC application with **2 distinct user roles**(Admin and Employee), each with isolated **protected routing** and separate dashboard views using React Router.
- Implemented secure server-side **authentication** using JWT and Bcrypt password hashing, replacing earlier client-side auth with a production-standard backend flow.
- Designed scalable frontend architecture with reusable functional components and centralized Context API state, enabling clean separation of role-based UI logic.

### Personal Portfolio Website

*HTML5, CSS3, JavaScript, Tailwind CSS*

GitHub | [Live Demo](#)

- Designed** and deployed a fully responsive portfolio website, ensuring consistent user experience across mobile, tablet, and desktop devices using Tailwind CSS.
- Deployed the portfolio website on **Vercel** with GitHub-integrated deployment workflows, enabling automated builds and seamless production updates for every code commit.

## Experience

### Full Stack Developer Intern — XCoders IT Solutions

*Jan 2025 – Aug 2025*

- Developed end-to-end **MERN stack** features across 3 internal projects — spanning MongoDB schema design, Express REST API construction, and React UI implementation.
- Implemented **JWT authentication** flows and MongoDB CRUD operations, handling the complete request lifecycle from client-side form submission to database persistence.
- Contributed** to a structured engineering workflow using **Git** branching, code reviews, and iterative sprint-based delivery under senior developer mentorship.

## Education

**B.Tech in Computer Science & Engineering (Advanced Computing)**  
SAGE University, Indore

*2022 – 2026*  
**CGPA: 7.05 / 10.0**
